

DESCRIPTION

The SkiTooth guarantees good audio quality with its two 40 mm X-Large speakers, the performance of its two speakers allows a rich sound and an incredible bass reproduction. In addition, the positioning of the speakers in the ears guarantees absolute comfort. Finally, the SkiTooth is also equipped with an integrated microphone for telephone communications.

*Helmet not included.

Audio and calls at your fingertips

No more having to take off your headphones, gloves, and search for your phone, with SkiTooth one press of a button allows you to answer/make calls, listen to music and activate voice dialing. The control buttons are easy to access even when wearing gloves.

Maximum support and security

With traditional headphones, it's difficult to hear what's going on around you, but with SkiTooth it's no longer a problem. With its high quality speakers that only loosen your ears, external sounds are not cut off, so you can ski safely.

Quick and easy installation

Installation takes seconds, unlike other systems available on the market, there is no need to fix, glue or damage the helmet to install it. Simply clip on each side of the headset at ear level and it's ready to use. In addition, SkiTooth is universal, so it can be installed on all types of ski or snowboard helmets, regardless of size.

Designed for adventure

This headset is perfect for sports such as skiing or snowboarding. Very easy to attach to the helmet itself, they will allow you to listen to music or manage calls while you have a great time practising these mountain sports.

A kit that lasts and lasts

With up to 14 hours of battery life, this kit is perfect for any intense sports session. Plus, it only takes 3 hours to fully charge - the perfect accessory to ensure you never run out of energy!
