

Gaming desk, Adjustable height, RGB LED lights, Built-in manual control, 100V, Black

DESCRIPTION

Enter to another dimension with this state-of-the art adjustable gaming desk. Its RGB LED lights and its built-in manual control make you being part of any videogame. Life an immersive experience and don't get up from the chair thanks to its multiple extras and functionalities.

Futuristic design

This light and resistant desk is inspired in the most futuristic video game screens of the moment. Moreover, it offers an innovative angular design and an easy height adjustment. Its wooden structure with metal legs and carbon fiber details provides you the gamer style you are looking for.

Illuminate your gaming time

Create your own videogames scenario playing with the different colors which provides this desk. The RGB LED lights offers endless possibilities to spice up any type of videogame either action games, arcade, strategy or sport games.

Easy control

Apart from controlling your joystick or mouse, this desk will allow you to adapt the desk to your needs thanks to its control panel. You will need only two buttons to adjust the height to improve your gaming experience.

A setup ready to win

All gamers need a good worktable. Our desk offers extraordinary options to have all you need handy. It counts on a cupholder, a headphones hook and a keyboard and mouse support. Thus, your games will be only victories!

Impact protection

This desk is ready for the more difficult displays. Its motor includes an advanced function against shocks to protect it for any adversity. In addition, it offers 4 adjustable positions with memory function to choose the desired height in every game.
