

DESCRIPTION

The SmartLED RGB + CCT silicone coated SmartLED strip is the ultimate home decoration. Up to 5 metres of cuttable light with which you can play with white lights and RGB colours with the help of its remote control or its app. Up to 900 lumens with which you can create unique and incomparable atmospheres.

A myriad of RGB colours

Our SmartLED strip offers an infinite number of colour options. Choose from the options offered by its remote control or, if you prefer, you can modify the colours from the app. Here you will find millions of colours! Because you set the colour limits.

Light that adapts to your routine

Its different shades of CCT white light offer a balance between productivity and relaxation to suit your day-to-day life. Get the best cool, bright light to wake you up and soft light to relax you after work and contribute positively to your health.

Intelligent and intuitive control

Thanks to the app, you can not only turn the lights on and off from your mobile phone. You can also schedule on and off times to save energy, synchronise the lights with your favourite music and choose from unique lighting modes designed for your different activities throughout the day.

The lights that listen to you

The WiFi connection of the SmartLED strip will make it very easy to control the lighting simply with your voice. Its compatibility with voice assistants such as Alexa, Siri and Google Home will give you control of your lighting from any room in your home or away from home.

Personalise them your way

This 5-metre strip gives the possibility to cut them and adapt them in the best way to the needs of any solid surface. In addition, their minimalist design, coated with silicone for better maintenance, resistance and durability, makes them a discreet accessory that can be camouflaged anywhere.
