

## DESCRIPTION

Portable charger for electric cars from KSIX with adjustable charging power from 2 to 16 amps. This system allows to ensure a gradual charging of the electric car both in places with an older installation or with less contracted power.

### Safety and durability

Our portable charger has a TPU charging cable waterproofed to IP67 standards and is TÜV CE certified to prove that it has been manufactured under the safety protocols required by government guidelines.

- Charging power up to 3.7 Kw (2-16A)
- 5m cable length
- AC single phase cable
- Includes connector covers
- Compatible with all chargers with type 2 connectors
