

## DESCRIPTION

It's an absolute eye-catcher. Our Rainbow connected ceiling light includes a huge variety of RGB light modes and color temperatures to create the ambiance you want whenever you want. Plus, it includes a speaker and light modes that dance to the music beats.

### Incredibly colorful

It is impossible not to find the color you want. Thanks to its range of RGB colors, choosing a color for each environment is possible. In addition, it includes several dynamic color modes to turn the room into a party.

### Full volume

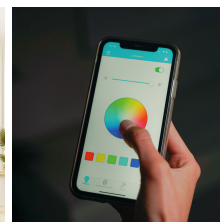

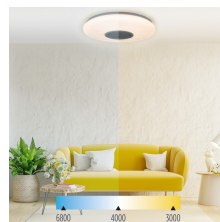

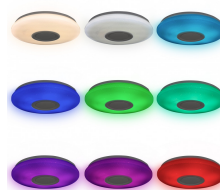

This ceiling light is the bomb! It includes a built-in speaker so you can play your favorite songs with excellent audio quality. Plus, you can synchronize the lights to dance to the music with its color and music modes.

### Tick, tick, tick

Thanks to the app, you can set timers to turn the lights on or off at the time you want. Everything under control!

### You choose how to control it

Remote control or i-Link app, which is your team? It includes a remote control with which you can have everything under control quickly, and it can be connected to the i-Link app to multiply its possibilities. You choose how you want to control your Rainbow.
