DESCRIPTION

This LED light with integrated motion sensor and rechargeable lithium battery has arrived to say goodbye to the darkness of any drawer or closet. It requires no wires or electrical installation and is very easy to install thanks to its adhesive system and magnetic fastening - an ideal solution to achieve the atmosphere you dream of!

Without complications

Thanks to its magnetic fastening system, there is no need to drill holes. With the simple gesture of sticking the two metal pieces with adhesive to the surface, you will be able to fix the light wherever you prefer, and you can take it out and take it with you anywhere, just like a torch!

No need to buy batteries

The 1.800mAh rechargeable lithium battery makes your life a little easier and saves you money on batteries. In just 4 hours of charging you'll have your LED light ready to light up for hours, days and weeks.

A lighting mode for every moment

Day, night and steady. These are the three modes that Sophia offers you. Its built-in motion sensor, with a movement range of 120º, will regulate the amount of light in each moment and mode. The best way to save energy!

Blends in with your home

Sophia is modern and minimalist. An LED light made from anodised aluminium, a resistant and abrasion-proof material that fits perfectly in any room or corner of the house.
Not a corner without light

This light emits a neutral white light of 4,000K and incorporates 80 LEDs. A total of 200 lumens of intensity that no dark corner can resist.
