UV Lamp KSIX PROT UV Film Screen, 24W, Ultraviolet Light, For Cutting Machine

DESCRIPTION

UV lamp required for the attachment of UV films. This ultraviolet light activates the UV properties of the films by simply applying the light for approximately 30 seconds on top of the film protector already in place. A way to achieve better protection and resistance.

Compatible with UV Films

The UV lamp with 24W of power and an input voltage of 5V, is the tool you will need to harden our UV films. A very easy to use machine that will strengthen any protector by applying its light for a few seconds (approx. 30 seconds) on the movable protector.

Increased hardness and quality

The UV technology that you will be able to activate in the UV Films using this machine guarantees a higher hardness and resistance of the mobile protection and a top quality finish. Its sling length of 365+405nm and its input frequency of 25W 1min will offer the highest hardness to any UV protector.

About the Automatic Cutting Machine

The ideal solution for stores that want to optimize their space and avoid obsolescence or being out of stock at the same time.

Integrated app

With WiFi connection and an integrated App which works with a touch panel. This lets you set the cut according to the device.

Maintenance included

Its extensive database of mobile terminals, gadgets and Tablets is updated daily with the latest market developments. Therefore, brands and models of all different devices will always be available.

Profitable

Each hydrogel film brings a great margin that will quickly make up for the machines cost. In addition, it allows you to save money as you wont need to buy a different protector for each device model.

2-year warranty and technical attention

The Automatic Cutting Machine includes a 2-year warranty as well as personalized advice from our technical and commercial staff, so that you can get the most out of it.
