Screen Protector for Galaxy A23, Tempered Glass, 9H Resistance, Thickness 0.3 mm

DESCRIPTION

The clear flat tempered glass screen protector is the toughest option you'll find for your Galaxy A23, with a strength rating of 9H, the highest on the hardness scale. The strength of protection in one product.

100% flat and transparent

It glass is characterised by being flat (0.3 mm) and transparent. With our protectors you can comfortably read messages, consult articles and even watch the best videos of the moment with total clarity.

Bulletproof

Our screen protectors have the highest resistance level in screen protectors, exactly 9H level. The perfect scale of hardness that will make you not have to worry about bumps, scratches or falls.

A product that protects your smartphone to the maximum, as it absorbs any hard blow, preventing your screen from shattering. A real protective shield to keep your screen always intact.

In addition, it comes with an oleophobic coating, capable of repelling water, grease and dirt, avoiding fingerprints on the screen.

An unnoticed protector

Its level of sensitivity ensures excellent touchscreen performance. The touch panel is so sensitive to your fingers that you will use the phone with the feeling of not having any screen protector on your smartphone. Agile movements on a tempered glass that seems invisible.
