

DESCRIPTION

Leef iBridge Air is a powerful device that wirelessly connects to Apple and Android devices to add streaming capacity, allowing to share and store your most valuable memories. It is the perfect alternative to iCloud® and is compatible with Windows, Mac, iOS and Android. Leef iBridge Air allows: **STREAMING:** Sharing MP4 videos and MP3 music wirelessly with other Apple or Android devices. It's perfect for travelling or long car and plane trips. **SHARING:** Sharing pictures and videos with Friends and family as they are being created. **STORING:** it allows creating a storage point (using its own Wi-Fi access point) of all pictures and videos in Apple and Android devices. Thus you won't need to send them via e-mail or message. **BACKING UP:** It allows creating an automatic backup for pictures, videos or any other file via Wi-Fi. **MIGRATING:** it allows transferring files from an iPhone or iPad wirelessly, to liberate space. **SAVING:** it is the perfect alternative to iCloud. It is a backup system that doesn't have monthly installments.
