

DESCRIPTION

Ignite a passion for photography in the little ones at home! With the Insta 12 MP Camera, getting the best snapshots has never been easier.

Memories are not lost

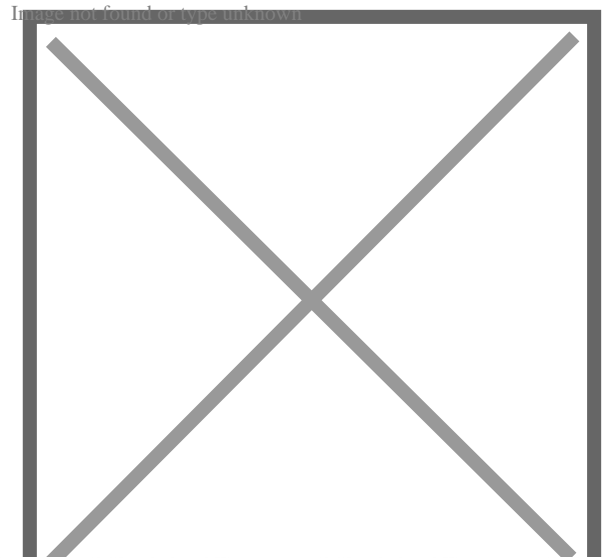

The Insta Camera uses the latest thermal printing technology to create vivid, clear photos without waiting for them to dry - and without shaking them! All in as little as 10 seconds. Plus, it supports up to a 32GB microSD card so your best moments are always safely stored.

Frame your best memories

The camera comes with a wide variety of preloaded photo frames so that no photo is the same as the last. Let your little ones' imagination go beyond the white frame.

More than just photos

Insta Camera goes beyond photos. Record 1920 x 1080 videos and store them on the camera to watch whenever you want. Kids can become the directors of the best short films.
