

DESCRIPTION

The Nextool outdoor flashlight offers different modes and intensities of lighting in a single product. Its anti-slip and ergonomic design, together with its multiple functions, make this flashlight in your best traveling companion adapted to all your needs.

Everything in view

Its power of 1000 lumens and 240 meters of range distance offer you a greater visibility of everything around you in your outdoor trips.

Illuminate every corner!

Thanks to its adjustable holder with magnetic attachment and 360° rotation, you can keep your hands free and illuminate where you need it the most.

Always at 100%!

The best of all, no batteries needed! It counts on a type-C charging cable. Only 3,5h will be enough to obtain full battery charge. In addition, it can be used as power bank in case of emergency.

Up to 90h of autonomy

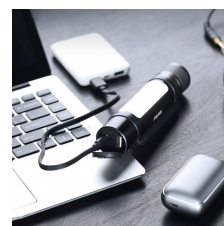

The flashlight contains a lithium high-capacity battery. It offers up to 90h of autonomy in strobe mode in the side lamp and up to 24h of autonomy in low mode in the flashlight.

Fresnel patented lens

The lens of the flashlight is designed with Fresnel technology. This technology reduces the weakness of the light and improves the efficiency in uniform way.

Everything you need in a single click!

At the touch of the button situated in the tail, you can select one of the 4 intensities of the red and white lights. Also, you can choose between different modes: side lamp, camping light, S.O.S mode, etc.
