

## DESCRIPTION

Our Smartmi 1S heater is here to stay. The Smartmi 1S combines the latest design trends with the most revolutionary technology to offer unprecedented comfort.

### Outstanding design

Yes, we know the Smartmi 1S couldn't be more minimalist and sleeker, but that's not all. Thanks to its dual protection design, it offers child and blackout protection – everything is under control!

### Perfect temperature control

The Smartmi 1S adapts perfectly to your needs thanks to its temperature setting between 16 and 28°C. In addition, it allows you to control and set constant temperatures to ensure maximum energy saving.

### You won't notice it

Our Smartmi 1S is pure power, but the fuss doesn't go with it. Thanks to its convection heat technology, it doesn't need a fan, so it couldn't be quieter. Plus, it doesn't generate airflows.

### Water resistance

The bathroom can become the warmest room in the house, even in winter. Thanks to its IPX4 water resistance, the Smartmi can be your best ally to maintain an optimal temperature even in wet rooms.

### One APP to rule them all

Take the reins and control your Smartmi 1S from your mobile with the Xiaomi Home App, or connect it to your Google and Alexa devices.
