

DESCRIPTION

This activity tracker is all about versatility. In addition to tracking your daily activity, it includes a GPS, barometer, compass, heart rate monitor and different sport modes. It has 3 different interchangeable straps (black, lime and blue) so you'll never get tired of it.

Up to 1 week of autonomy

Enjoy up to 7 days of normal watch use. With continuous GPS use, the battery life is reduced to 10 hours.

App Smart Time

The wristband comes with the Smart Time app. Download it on your smartphone and you can enjoy the different functions it offers: GPS, sleep monitor, calorie counter, pedometer, distance travelled, blood oxygen saturation, heart rate monitor, sedentary reminder, body weight record, stopwatch, and much more.

SpO2 monitoring

This activity wristband includes an SpO2 monitoring feature that allows you to constantly track your blood oxygen saturation levels, even while you sleep.

Sedentary reminder

Includes a sedentary reminder function that alerts you when you haven't moved for too long - don't stop!

Remote control of the camera

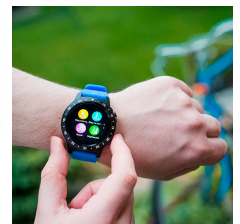

Thanks to the remote control, you can take photos and control all the camera functions of your smartphone remotely.

Customisable display with dozens of dials

Choose the right dial for every occasion! Enjoy the clarity offered by this wristband thanks to the 1.3 inch IPS display.

Say goodbye to your personal trainer!

This wristband offers 11 different sport modes adapted to all your needs offering various exercise options so that your workouts won't be monotonous and boring.
