

DESCRIPTION

Jump-start creativity and problem solving with this inspiring combination of artistic tools and cutting-edge technology. The creative whiteboard and markers are specially designed to make the best use of Osmo technology. The kit is designed for children to learn about problem solving, visual thinking, creativity and drawing technique.

Includes 3 games: Monster Bring drawings to life! When children draw something on the board, for example a magic wand, Mo animatedly places that same wand on the screen and uses it himself.

That's magic. Newton Physics meets doodling: make the balls falling on the screen fall into the target by drawing obstacles on the board. Balls bounce, roll and bounce, challenging kids to think in new and creative ways. Masterpiece transform any image into easy-to-draw lines, making it easy to create amazing works of art. Kids can even make cool time-lapse videos of the drawing process to share with their biggest fans. Age: 4 to 10 years old
