

DESCRIPTION

Our 30W wall charger with built-in Made For iPhone cable is a safe option for charging your iPhone or iPad. It is also compatible with Android models such as Samsung, Xiaomi, Oppo... simply by using a different type of cable. Charge your device in the shortest possible time and welcome ultra-fast charging with this charger. It also features GaN technology: the fastest, most efficient and durable way to charge devices.

Charge your phone in less than an hour

Get your smartphone fully charged in less than an hour thanks to its 30W power, making it an ultra-fast charging charger. Our charger with USB-C port will allow you to charge your smartphone or tablet quickly and efficiently at home, at work and anywhere there is a power socket.

GaN: a technology that extends your battery life

Thanks to GaN you will be able to charge devices that demand a lot of energy in less time and generate less heating in the device. This technology allows you to extend the life of your mobile's battery, offering a much more efficient charge. In addition, it ends charging when the battery is completely full, without affecting the charger or the device.

GaN was created to handle really high voltages. It is the cutting edge of the most advanced chargers. And best of all, it has a much longer life than any conventional charger.

Chip specially designed for iPhone, and also for Samsung!

This charger has been designed by integrating Power Delivery (PD) and Programmable Power Supply (PPS) technologies to provide ultra-fast, ultra-safe charging that won't overheat or overcharge your Apple or Samsung devices.

For Apple models, this charger uses Power Delivery (PD) fast charging technology that allows the USB-C Lightning cable to deliver a higher level of power to your smartphone.

In the Android versions, the Programmable Power Supply (PPS) technology, designed exclusively for this manufacturer, will be in charge of adjusting the voltage and current in real time to charge your device in the shortest possible time and with the maximum power, using the necessary cable.

PD and PPS charging technologies enable powerful and efficient charging of a wider range of devices.

With USB-C port: the standard of the future

Its USB-C charging port is the most advantageous solution you can imagine, as it is presented as the charging of the future thanks to its versatility. A port capable of providing power through ultra-fast charging: a technology that allows devices to achieve more battery in less time. The ultimate connector that is expanding its presence with mobile phones as well as laptops, monitors and other devices.

Made For iPhone Warranty

It also includes a metre-long USB-C to Lightning cable that is Made for iPhone (MFi) certified. MFi-certified products have passed numerous Apple-designed

tests. MFi Certified cables are a safe and stable charging solution for your devices.
The best way to enjoy optimal charging for your iPhone, iPad or iPod.

TECHNICAL SPECIFICATIONS.

Color	White
Maximum output power	5V/3A, 9V/3A, 12V/2.5A, 15V/2A, 20V/1.5A
Output connector 1	Lightning
Input parameters	100-240V
Type of charge	GaN ultra fast charge
Max. Output (W)	30W
Input connector	USB-C
Technology	GaN + PD + PPS
Cable length	1 m
Connector type	USB-C to Lightning Cable
Content	Wall charger + cable
Packaging	Recycled carton
