

DESCRIPTION

Enjoy and control your sports sessions with the new Amazfit GTS 4 smartwatch model thanks to its more than 150 sports modes. A smartwatch that has a large AMOLED screen with a careful design that adapts in the best way to your day to day thanks to its multiple functions such as its GPS or its Bluetooth calls, among many other things.

Find your sport mode

More than 150 sport modes are waiting for you on this watch to track your physical activity in detail: calories burned, heart rate, duration of workouts...

Its PeakBeats function will show you the data of your sports sessions once you have finished with data such as maximum oxygen consumption, training load... In addition, it is compatible with some of the top apps on the market such as Strava or Adidas Running.

Maximum visibility

The Amazfit GTS 4's huge, colourful AMOLED HD display will make viewing all the information on your watch a super-pleasant experience. From here you can receive incoming call information, notifications, health and sport data and much more.

In addition, you can fully customise your screen by choosing from over 150 watch faces. You can also add widgets of your choice and include your own photos as wallpaper.

A sensor that takes care of your health

The GTS 4 debuts the new BioTracker™ 4.0 PPG biometric sensor, enhanced with 2 LED's and an ultra-thin 0.4 millimetre glass base, which is capable of collecting 33% more accurate data than the previous generation.

This smartwatch is capable of tracking your health, monitoring your heart rate and blood oxygen saturation throughout the day, and alerting you if it detects any abnormalities in the measurements. It also includes many other options such as sleep tracking, breathing quality, stress monitoring and much more.

Your daily companion

If you're looking for a smartwatch that syncs with your daily routine, the GTS 4 will give you all the features you're looking for. A watch that syncs with your mobile phone and allows you to receive real-time alerts and notifications and answer your Bluetooth calls.

Its GPS function and 5ATM water resistance will make it the perfect fit for your day-to-day adventures. It is also compatible with your personal voice assistants like Alexa or Google Home thanks to its new Zepp 2.0.

Up to 30 days of unlimited battery life

The Amazfit GTS 4's 300 mAh battery is designed to provide up to 8 days* of typical daily use, up to 4 days* of heavy use, up to 16 hours* with GPS enabled and up to 30 days* in Power Save Mode.
