

DESCRIPTION

The Xiaomi Electric Scooter 4 Pro electric scooter is the way of transport you were looking for to move around the city. With a range of up to 55km it will allow you to travel anywhere. Its foldable design will make travelling with it on public transport a real advantage. With rechargeable lithium battery to get the most out of its high performance 700W motor.

High-performance engine

Its powerful 700W motor offers a 20% climbing capacity and a maximum speed of 25km/h to move around the city without any problem. It also includes a multifunction panel from which you can view data such as speed, power and other information in real time. Its manual throttle and dual front and rear braking system will also bring you closer to safety on the road.

Three speed modes

Just double tap the power button to change the speed mode and easily adjust the speed according to the environment. You can choose between 0-6km/h, 0-20km/h and 0-25km/h. An enlarged and comfortable grip with a new pattern design will make switching between speed modes easy.

High-security lithium battery

This Xiaomi electric scooter offers a long battery life. The battery is safe and durable, with a capacity of 446 Wh. It accelerates quickly and reaches a top speed of 25 km/h. On a full charge you can travel up to 55 km. Charging is also very easy thanks to its Magnetic Charging with automatic attachment that allows you to plug it in blindly, which enhances the experience.

Intelligent battery management system

Six smart protections keep your battery safe and extend its life. Use the Mi Home app to monitor battery status. You can protect the battery against short circuits, overcurrent, overcharging, over-discharge, thermal protection and automatic suspension due to undervoltage.

Self-sealing tubeless tyres

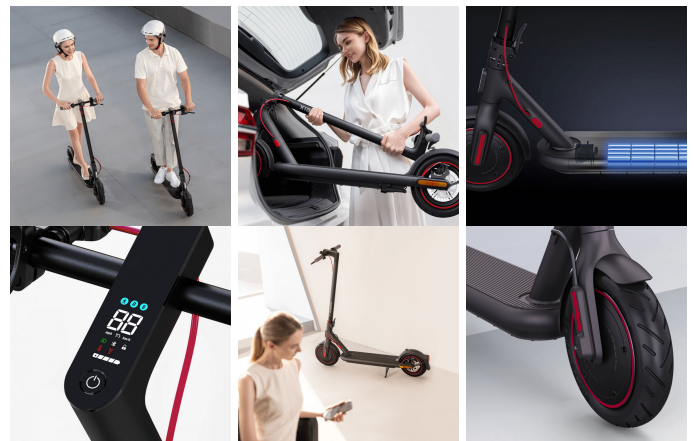

The unique Xiaomi DuraGel tyres are self-sealing 10" tubeless tyres that are more inflated than normal 8.5" tyres and are more comfortable to drive on. With the self-sealing coating, you don't have to fear rough roads. If they get a puncture, they are automatically sealed, so driving safety is even better.

Folds in 3 seconds

It is made of low-density, high-strength aerospace-grade aluminium alloy material and can carry a load of up to 120 kg. With a net weight of 17 kg, you can easily carry it anywhere, anytime.

Energy recovery system

The Kinetic Energy Recovery System (KERS) has been completely upgraded and energy conversion efficiency has been further improved. It is capable of recovering kinetic energy during braking and coasting, and converting it into usable electrical energy to further improve travel distance. The efficiency of

energy recovery can be adjusted via the My Home app to suit your individual driving needs.

Own App

The Xiaomi Electric Scooter 4 Pro can connect to the Mi Home app via Bluetooth to lock or unlock the scooter, install firmware updates and monitor riding data (such as mileage, speed, remaining battery life and more). The "strong pairing" method ensures that no one can pair your scooter without your approval.

TECHNICAL SPECIFICATIONS.

Weight	17 kg
Dimensions	51 x 119.8 x 48cm
Color	Black
Power	Lithium battery
Autonomy	55 km
Charging time	8 hours
Battery	12.400 mAh
Degree of protection	IPX4
Power	700W
APP	Me Home
Speed	25 km/h
Display	LED
Maximum weight supported	120 kg
Height range	120 - 200 cm
Noise	Silent
Holder	Yes
Unfolded dimensions	124 x 119.8 x 48 cm
Type of brake	E-ABS
Speed class	3 modes
Climbing angle	20% max
