

DESCRIPTION

If you are one of those people who love travelling and getaways, this Power Station is a must for your adventures. The way to always have access to a power supply wherever you are, it can also function as an extra power source for your home. It incorporates a 1.021 Wh power and a 276.000 mAh battery capacity, LED display and 6 power outputs to charge phones, cameras or even small appliances. Simply charge the station for 3 hours on the mains or with the help of the solar panel and it will be ready to go. It is also linked to the TuyaSmart app from which you can regulate the power.

Maximum power for your getaway

Its 1.021 Wh Li-ion battery with a 276.000 mAh capacity will give you enough power for your journey. To charge it, simply connect the Power Station for 5 hours to any mains power source via its 30 V DC input or its 100 W USB-C input. If you prefer a cheaper and more eco-friendly option, you can charge it through a solar panel (not included) up to 240 W. Just find a solar light source... and you're ready to go!

Charging time varies depending on the power source. 5-6 h AC Power Adapter / 6-12 h Solar Panel / 13-14 h USB-C input / 14-15 h Car Charger

Connect up to 6 devices

This station has 6 power outputs from which you can connect various devices or small appliances. Here you will find 2 AC sockets with a maximum output of 2400 W, 2 USB-A outputs, 18 W sockets, 1 x 100 W USB-C PD port and 1 x 120 W DC output. And all this without the need for an external power supply. An ideal Power Station to take on trips or to connect extra devices at home.

Control power from your mobile phone

Its Bluetooth connection allows you to connect the Power Station to the TuyaSmart app. An app available for Android and Apple that will allow you to regulate the power of each of the output ports from your mobile or tablet. Personalize your consumption and enjoy your journey even more.

Integrated LED display

The LED display tells you everything. When the product is fully charged, the LED display turns off and stops charging. When a function is activated, the display lights up. When the display is not needed, you can simply press the button to turn off the LED display. A quick way to check battery level, input and output power and see if Bluetooth is connected or not.

Easy to transport

Its design with built-in handle makes it easy to carry its 9,2 kg weight. A Power Station that doesn't take up too much space and will allow you to take it anywhere. It also includes two chargers: an AC power adapter and a car charger to charge your Power Station.
