

DESCRIPTION

Neonise your garden, your pool or the path to your house with this smart and flexible neon strip with 270° lighting angle. Play with several RGBIC colours at once through the TuyaSmart app, program on/off times and much more. With IP65 protection so rain is no problem. Plus, it's super easy to attach thanks to its included aluminium clips. The most futuristic outdoor lighting has arrived!

Coloured light in neon format

This neon strip not only offers 380 lumens, 32W of power and 84 LED pieces per metre. It also has an infinity of Dream Color RGBIC colours that allows you to play with several colours at the same time, creating really unique effects. From the app you can customise each of the parts of the neon, achieving a strip full of different colours and effects.

Control the neon from your mobile phone

Turn the neon on and off, regulate the power, synchronise it with the music and even programme the lighting hours of your strip from your smartphone to save energy. All from the comfort of the TuyaSmart or Smart Life apps, making it easy and fun to control the lighting. Available for Android and Apple devices. You can also control it from its IR remote control, its integrated remote control or through voice assistants.

Waterproof and rainproof

The IP65 protection of this neon strip means that the weather outside won't be a problem. It doesn't matter if a storm hits, because your outdoor lighting will be protected against all kinds of weather. Just protect the socket... and everything will be under control!

Quick and easy installation

First you need to find a completely smooth, dry and clean surface. Install the aluminium clips on the surface with the screws, attach the neon strip to each of the clips, connect the power adapter... And you have your neon ready to go!

5 metres of neon light

This flexible neon strip with a lighting angle of 270°, designed to create much more enveloping and personalised atmospheres, is 5 metres long and will allow you to illuminate any large outdoor surface without any problem. Try it to illuminate walls, pool edges, paths... Or any area of your garden that you want to make shine.
