

DESCRIPTION

Oslo is a smartwatch ready for any adventure that comes its way thanks to its 5 days of autonomy, its IP68 protection, its multiple sport modes and its design. A model that will make your life a little easier as it allows you to make and receive calls directly from the watch and is compatible with voice assistants. It also incorporates multiple health functions with which to monitor your vital signs 24 hours a day. The smartwatch that offers everything you need!

Make calls, receive alerts

Feel like you are in an action movie with this great functionality offered by this watch. With it you can manage your calls at any time and from anywhere directly from your Oslo thanks to its hands-free calling function. Its MActive Pro app allows you to synchronize your favorite contacts from the agenda, while letting you configure alerts and notifications from your favorite apps.

Activate your body and mind

This smartwatch offers as many sport modes as you can imagine in order to measure your workouts in the most accurate way. In addition, it incorporates other functions to keep you always active such as movement reminder, pedometer, stopwatch and much more. If you are looking for an active lifestyle, Oslo is with you.

Monitor your health

Measure your heart rate, control your blood oxygen, monitor your sleep hours, perform breathing exercises and much more with this watch designed to monitor health. The great ally to control the health of our heart and keep in touch with your vital signs 24 hours a day thanks to its built-in sensor at the bottom of the dial.

Designed for adventure

Its 1,5" multi-touch IPS screen, with enough space to navigate the watch, and its robust and resistant design are the best fit for your wrist when performing any type of activity out there. In addition, its IP68 protection will allow you to perform activities in the water without worrying about anything.

Add it to your leisure time

This smartwatch offers up to 5 days of battery life. With it you can play your favorite songs, control your voice assistants, use it as NFC support, customize the wallpaper, create your own password, take photos from your own smartphone and much more. Endless possibilities await you in the MActive Pro app.

NFC support does not function as a payment method. It simply serves to transfer data directly from the watch in the form of tickets, gym passes, among others. We recommend consulting the compatibility of this technology with each establishment beforehand.

Product information

Smartwatch case: Ø46 mm x 13 mm thick. Material: aluminum alloy

Smartwatch display: 1.28" Multi-touch, dimensions Ø37 mm. Material: Calcium

carbonate glass

Smartwatch strap: 26 cm long (including smartwatch case) x 24 mm wide.
Material: silicone. Removable straps for easy cleaning (straps available on our website)

Wrist closure range: The size of the Oslo straps is standard offering a closure range of 6cm to 8.5cm wrist diameter. Not recommended for people with very small wrists, as this would make it difficult to calculate health data as the watch is not well attached to the wrist.

In case of swimming in the sea or in a salt water pool, it is recommended to rinse the watch with fresh water after immersion due to the corrosive effect of salt water.
