

DESCRIPTION

The Ksix smartwatch display, made of resistant PVC, is the perfect tool to present the entire range of the latest generation of Ksix smartwatches at any point of sale. The ideal tool to place behind the counter or in a showcase. It is very easy to install thanks to its folding mounting system and its included screws and nuts. In addition, it incorporates sales arguments to boost purchases.

Designed for your selling point

The 34 x 27,5 x 21 cm POS display is specially designed to show the end customer the whole range of Ksix smartwatches in a closer and more direct way. Its compact and minimalist design is ideal for any space at the point of sale such as counters, showcases or shelves.

Presentation of the smartwatch range

The display has been custom developed for the Ksix smartwatch range. It incorporates 5 slots to accommodate the latest generation Ksix watches such as Compass, Core, Urban 4, Urban Plus and Oslo.

The POS display does not include the smartwatches shown in the image.

A tool to boost sales

This sales tool, designed especially for Ksix smartwatches, clearly communicates the features and key benefits shared by all models through written and visual sales arguments.

A premium display

It is quick and easy to install thanks to its folding assembly system. Simply join the parts together and fix them with the screws and nuts included, and the display will be ready in a matter of seconds. In addition, it is made from ultra-resistant PVC, which guarantees greater durability and resistance to wear.
