

DESCRIPTION

The Kingsmith WalkingPad R2H treadmill, with additional handrails, is the ideal choice for exercising in the comfort of your own home. Its patented folding design allows it to be stored as discreetly as possible in any room. With a quiet brushless motor and Foot Control Speed speed adjustment system, you can train without disturbing others while reaching 12 km/h at your own pace. Plus, its LED panel, remote control and KS Fit app, compatible with mobile devices and Apple Watch, make it easy to control and track your workouts.

Patented folding design

The R2H treadmill introduces an innovative folding design that transforms the exercise experience at home. Its patented folding system allows the treadmill to be folded in three parts, up to 180°, simplifying handling and making it convenient to store in small spaces. In addition, its additional side handrails allow you to attach or remove them depending on the kind of workout you are looking for, always integrating in the best way when folding or unfolding the treadmill.

Technology that keeps pace with you

The WalkingPad R2H is pure innovation thanks to its advanced Foot Control Speed technology that automatically adjusts speed up to 12 km/h to ensure optimal performance and maximum safety. With three training modes available (adaptive, automatic and manual) you have total control over how you prefer to train.

LED display for maximum visibility

The integrated LED panel clearly and concisely displays speed, distance travelled, training time and other relevant data from your workout. Its strategic location ensures optimal visibility while you train.

Silent exercise up to 12 km/h

The R2H's 1.25 HP brushless motor offers a wide speed range from 1 to 12 km/h, ensuring challenging and quiet workouts with less than 55 dB of noise. You can control the speed manually via the KS Fit app, the remote control or the built-in LED display, allowing you to work out comfortably both day and night without worrying about disturbing your family or neighbours.

App for mobile, tablet and Apple Watch

Download the KS Fit app available for iOS and Android and synchronise it with the treadmill via Bluetooth, from your smartphone, tablet or Apple Watch and regulate the speed manually and have more exhaustive control over the exercise you do. You can check the distance covered, steps taken, calories burned and much more.

Training extras

The treadmill has additional accessories and features that enhance your exercise experience, such as a mobile phone slot, safety locking system, handrails for stability, anti-slip side strips and remote control. A way to enjoy more professional, complete and safe workouts.

TECHNICAL SPECIFICATIONS.

Weight	40,5 kg
Dimensions	100 x 72 x 16.2 cm
Color	Black
Connectivity	Wireless compatible+ WiFi
APP	KS Fit
Shape	Premium
