

DESCRIPTION

Enjoy a more efficient and sustainable charging experience with the KSIX 20W wall charger. Equipped with GaN technology, Power Delivery 3.0, and PPS, this compact charger provides fast and intelligent charging, adapting to your device's needs in real time to maximize speed without compromising battery health. Additionally, it is made from 80% recycled plastic and holds the Global Recycled Standard (GRS) certification, ensuring a responsible and sustainable manufacturing process.

Fast and efficient charging with Power Delivery

The 20W USB-C port delivers ultra-fast charging for devices compatible with Power Delivery 3.0 (PD). Thanks to this technology, you can charge your smartphone, tablet, or any other compatible device in less time and more efficiently without overheating the battery.

GaN Technology: More power in a compact size

With innovative GaN (gallium nitride) technology, this charger is smaller, more powerful, and more efficient than traditional chargers. It reduces energy loss and overheating, ensuring a safer and longer-lasting charge.

Dynamic and intelligent charging with PPS

Featuring Programmable Power Supply (PPS) technology, this charger adjusts output power in real time, optimizing efficiency and reducing heat generation. This allows for faster and safer charging for devices such as the latest Samsung Galaxy models, Google Pixel, and other compatible devices.

Simultaneous charging

This charger includes two ports for simultaneous charging: - **USB-C:** 20W with Power Delivery 3.0 and PPS, perfect for high-speed charging. - **USB-A:** 18W, ideal for standard cables. With these two ports, you can charge two devices at the same time, optimizing charging time without losing efficiency.

Made from sustainable materials

This charger is not only powerful but also environmentally friendly. It is made from 80% recycled plastic, reducing its environmental impact. Additionally, its compact design makes it easy to carry anywhere without taking up too much space in your bag or backpack.

TECHNICAL SPECIFICATIONS.

Color	White
Type of charge	Fast charge
Max. Output (W)	20W

Technology

GaN + PD + PPS

Shape
