

DESCRIPTION

Forget about charging your phone halfway during the journey. With the KSIX fast car charger, you can power up your devices quickly and safely while on the road, whether it's an iPhone®, Samsung® or tablet. Its total output of 30W is split between a USB-C port with Power Delivery 3.0 and a USB-A port with Quick Charge 3.0, so you can charge up to two devices at the same time without losing speed. Compatible with any vehicle and designed to be your travel companion on every trip.

Power for all your devices

Charge your smartphone, tablet, handheld console, earphones or action camera regardless of brand or model. The USB-C port delivers up to 30W and the USB-A port up to 18W, allowing you to power an iPhone® or Samsung®, as well as an iPad®, Nintendo Switch® or Kindle®. Its universal compatibility ensures that no matter what device you use, you'll always have the power you need to stay connected.

Ultra-fast charging with Power Delivery 3.0

Enjoy fully powered batteries much sooner than with a standard charger. Thanks to Power Delivery 3.0 technology on the USB-C port, your device can reach up to 50% charge in just 30 minutes (depending on the model). With a maximum output of 30W, you not only gain speed but also protect your battery by delivering optimised and safe energy. Perfect for making the most of every stop and getting back on the road without waiting.

Extra boost with Quick Charge 3.0

If your device is compatible with Quick Charge 3.0, the USB-A port delivers up to 18W for a much faster charge than standard chargers. Get hours of use from just a few minutes connected and forget about running out of battery mid-journey. It also automatically adjusts the output to protect your battery life, improving charging efficiency.

Ready for any vehicle

From a compact car to an SUV, van, lorry or coach, its 12-24V input range makes it compatible with any type of vehicle. Whatever you drive, you can always keep your devices powered on every trip. Simply plug it into your car's cigarette lighter socket and forget about complications. Perfect for long journeys or daily use.

Compact and functional design

Minimalist on the outside, powerful on the inside. Its compact size fits perfectly into the cigarette lighter socket, while the built-in handle makes it easy to plug in and remove. When you're done, simply fold the handle and store it under the cover. Made with heat and wear-resistant materials, with an elegant black finish and silver details to complement any car interior. The premium design your car deserves.
