

## DESCRIPTION

The Armor Glass screen protector is made of TPU and a polymer-based multilayer solution with nanocrystal coating, so it has a high resistance to impacts. It has a 9H level resistance, the maximum in the hardness scale. Is perfect for those smartphones which integrate a finger print reader in their screen. Its 0.50 mm thickness protects the screen without interfering with its tactile functions. High resistance to impacts and scratches It is designed to prevent the smartphone screen from shattering if it receives an impact or accidentally falls to the ground. Its composition results in more durability and higher protection against impacts in comparison to glass. The product is safe to use. Compatible with finger print reader Everyday there are more and more smartphones including a finger print reader in their screens. Thanks to its flexibility, the Armor Glass protects the smartphone's screen without interfering with this functionality. Flat and curve screen compatible Being flexible, the Armor Glass adapts perfectly to any smartphone screen, whether it is flat or curve. Shatter proof The Armor Glass has a TPU anti-explosion layer. This layer prevents the smartphone screen from shattering if it receives an impact or accidentally falls to the ground. It includes an installation kit The included installation kit allows to install the protector on the smartphone in a precise and easy way, without any bubbles. Ksix is a brand from Atlantis Internacional. It has the largest collection of accessories designed to make the most of mobile

devices. Each product is presented in a modern and attractive packaging, which stands out on any shelf. It offers personalized customer service and complete after-sales service. Main features High resistance to impacts and scratches It's perfectly compatible with the finger print reader function It adapts to flat and curve screens It incorporates an anti-explosion TPU layer It includes an installation kit, to install it precisely, without making any bubbles Technical specifications Semi flexible screen protector High resistance to impacts and scratches 9H level resistance, the maximum in the hardness scale Oleo-phobic coating. Repels water and dirt 0.50 mm thick Material: TPU and polymer-based multilayer solution with nanocrystal coating

## TECHNICAL SPECIFICATIONS.
