KSIX Ultraslim 20W GaN wall charger, Power Delivery + PPS, Multi-port USB-C + USB-A, White

DESCRIPTION

A compact charger for every day: The KSIX 20W blends ultra-slim design, power and advanced technology so you can charge your devices with ease. At just 1.5 cm thin, it slips into any pocket or bag, ideal for work, home or travel. Its two ports, USB-C and USB-A, ensure compatibility with smartphones, tablets and accessories. With Power Delivery, PPS and Quick Charge 3.0 you get faster, safer and more efficient charging. It is your everyday companion to keep your iPhone® and other devices ready at all times.

Extraslim design for effortless carry

At only 1.5 cm thick, this extraslim charger is perfect for those who value comfort and practicality. Its compact size fits easily into bags, backpacks or pockets, without adding weight or taking space. On crowded power strips it does not block other plugs, keeping things tidy. Though small, it is tough and reliable, designed for daily use at home, in the office or on your travels. Sometimes less is more, and this charger proves it with style.

Two ports, zero complications

Enjoy fast charging with the 20W USB-C port featuring Power Delivery and PPS, and the 18W USB-A port with Quick Charge 3.0. You can charge an iPhone® 15, a Samsung Galaxy®, earbuds or a tablet in less time and with complete safety. Having two options means flexibility and the confidence that everything will be ready when you need it. The 20W power ensures stable performance both at home and in the office, without excuses or delays, and always with peace of mind.

GaN technology for efficiency

This charger features GaN technology, enabling more power in a smaller size, while generating less heat. The benefit is clear: fast, safe and stable charging in a compact body that stays cool even under heavy use. It also improves energy efficiency, helping reduce unnecessary consumption. Ideal for crowded sockets, busy offices or travel. Advanced technology that turns into comfort and reliability. Controlled power that fits right in your pocket.

Power Delivery: fast and secure

The USB-C port with Power Delivery automatically adapts output according to the device, cutting charge time and protecting the battery. Your iPhone®, iPad®, Android® smartphone or tablet receives just the energy it needs. Less waiting, more productivity and leisure. It also helps preserve long-term battery health thanks to its smart management. Whether at home, in the office or on the go, PD ensures efficient, safe and stable power to keep you moving.

PPS: charging with intelligence

PPS technology adjusts voltage and current in real time, offering maximum precision. That means less heat, greater safety and longer battery life. It is ideal for next-generation smartphones like Samsung Galaxy® or Google Pixel® that make the most of this feature. For you, it translates into faster and more careful charging, perfect for everyday life. PPS makes your charger understand each device's needs, adapting with intelligence and efficiency.
