

Kingsmith WalkingPad X214 folding treadmill, 14 km/h, 1.25 HP brushless moto, black

Track your progress with a simplified display

Intuitive and easy SpeedDial

Patented Quick-Release Side Handles

DESCRIPTION

The WalkingPad X214 is a foldable treadmill designed for efficient home training without taking up unnecessary space. It features a 1.25 HP brushless motor for quieter and long-lasting performance, an adjustable speed range from 1 to 14 km/h, and a spacious 47 x 18 inch running surface that ensures stability and comfort. Its adjustable handrail improves ergonomics, supports up to 110 kg, and comes fully assembled, ready to use straight out of the box.

Foldable design to save space

The WalkingPad X214 features a folding system designed to minimise the space it occupies when not in use. This structure allows it to be stored easily in small flats, home offices or multifunctional rooms. It is a solution created for homes where space matters, without compromising on a stable treadmill built for everyday use.

Adjustable ergonomic support

It includes a height-adjustable handrail that allows the grip to be adapted to different users and training styles. This adjustment improves ergonomics during walking, jogging or running, providing greater safety and comfort. A technical detail that supports long-term use and a more natural posture during each session.

Efficient and quiet brushless motor

Equipped with a 1.25 HP brushless motor, the X214 delivers quieter and more efficient performance compared to traditional motors. This system reduces noise levels, improves durability and optimises energy consumption, allowing you to train at home without disturbance and with consistent performance.

Adjustable speed and wide running surface

Its speed range from 1 to 14 km/h adapts to different activity levels, from gentle walking to running sessions. The 47 x 18 inch running belt provides a wide surface for a natural and stable stride, reducing the risk of slips and improving comfort during exercise.

Stability and instant use

Designed to support up to 110 kg, the WalkingPad X214 offers a solid and stable structure suitable for different user profiles. It comes fully assembled, with no installation required: simply unfold it and start training. A practical, technical solution ready to fit seamlessly into your daily routine.
