

## DESCRIPTION

KSIX Sense Bar is a sensor light designed to bring comfort, visibility and practicality to hallways, staircases and long areas of the home. It switches on only when needed, provides soft, adaptable lighting for everyday use and helps you move around at night with greater safety and comfort. Slim, discreet and USB-C rechargeable, it installs easily on smooth surfaces thanks to its magnetic adhesive base, offering a simple solution to improve your day-to-day lighting.

### Automatic light to move with ease

Sense Bar turns on automatically when it detects movement, guiding your steps exactly when you need it. It is ideal for staircases, hallways and long areas, where it provides a soft light that improves visibility and enhances the feeling of safety at home. At night, it is especially practical, as it avoids the need to search for switches and guides you without disturbing. In addition, thanks to the Linkage function, you can synchronise multiple lights to create more comfortable, fluid and seamless lighting paths.

### Technology that adapts to you

It integrates a PIR sensor with motion and ambient light detection, so it only turns on when needed. With a useful range of 6 metres and a 120° angle, it effectively covers passage areas with even, pleasant lighting that can be adjusted in intensity. It also offers three colour temperatures, 3000K, 4500K and 6500K, to suit different moments and environments. In addition, it includes three usage modes, night, day and always on, so you can choose how each space is lit. The result is a more comfortable, flexible and natural experience, always adapted to your surroundings and daily rhythm, without glare.

### Everyday-friendly battery life

Its integrated 1100 mAh battery provides up to 8 hours of autonomy to support your daily use with total convenience. When it is time to recharge, the included USB-A to USB-C cable makes it easy from the very first use, without relying on complex installations or nearby sockets. A fast charge of around 2 hours fits easily into your routine and gets it ready to use again quickly. As it does not require fixed wiring, you can place it wherever it suits you best and move it as your needs change. Practical, rechargeable and ready to follow you around the house, with real freedom.

### Clean design that fits your home

Its slim, linear design blends discreetly into any space and adds light without cluttering the environment. It installs easily on smooth surfaces using a magnetic adhesive base, with no tools required. The light then attaches magnetically to the base, so you can remove, reposition or recharge it whenever needed. Lightweight, versatile and highly convenient, it allows you to adapt lighting across different areas of your home, from furniture to walkways.
