

## DESCRIPTION

KSIX Sense Dot is a sensor light designed to bring comfort, visibility and practicality to wardrobes, drawers, furniture and small corners of the home. It switches on only when needed, provides soft and pleasant lighting for everyday use and installs easily on smooth surfaces thanks to its magnetic adhesive base. Compact, discreet and USB-C rechargeable, it is a simple solution to improve your day-to-day lighting.

### Targeted light for your everyday

Sense Dot turns on exactly when you need it, transforming small areas of your home into far more comfortable spaces. It is ideal for wardrobes, drawers, furniture or passage areas where an extra light makes all the difference without being intrusive. Its soft lighting helps you find what you need at night, prevents trips and adds a pleasant sense of order and calm. As it only activates when required, it is practical, efficient and perfect for daily use.

### Technology that lights up at the right moment

It features a PIR motion sensor with ambient light detection, so it only turns on at the right time. This creates a more intuitive, comfortable and efficient experience in smaller spaces around the home. With a range of up to 5 metres and a 120° angle, it covers the area with a natural white 4000K light that is even and easy on the eyes. It also adapts easily to each situation thanks to its ON, OFF and AUTO modes. Technology designed to support you without intrusion, providing just the right light with minimal effort. Everything works in a simple and natural way.

### Convenient battery life, no cables needed

Its integrated 600 mAh battery delivers up to 5 hours of autonomy, allowing you to use it daily without relying on sockets. When it is time to recharge, simply use the included USB-A to USB-C cable, making everything quick and easy from day one. No fixed wiring, no complex installations, and the freedom to place it wherever suits you best at any time. Practical, lightweight and always ready to follow your routine. Simple and convenient, every day.

### Discreet design that fits anywhere

Its compact, rounded design blends seamlessly into any corner, providing a practical lighting solution without cluttering the space. It installs easily on smooth surfaces using a magnetic adhesive base, with no tools or complications. The light then attaches magnetically to the base, so you can place, remove or recharge it with total ease. Lightweight and easy to move, it is perfect for adapting lighting in wardrobes, furniture or small spaces whenever needed. One of those simple ideas that just works perfectly at home.
