

DESCRIPTION

KSIX Sense Stick is a sensor light designed to bring comfort, visibility and practicality to bedrooms, entrances, hallways and other passage areas in the home. It switches on only when needed, provides soft, directed lighting for everyday use and helps you move around at night more safely without turning on the main lights. Slim, discreet and USB-C rechargeable, it installs easily on smooth surfaces thanks to its magnetic adhesive base and can also be used as a portable light whenever you need it.

Automatic light for every moment

Sense Stick turns on automatically when it detects movement, providing practical light exactly where you need it most. It is ideal for bedrooms, entrances and hallways, especially in narrow or vertical spaces where a focused light makes all the difference. At night, it helps you move around more calmly without switching on the main light, and when needed, you can remove it from its magnetic base and use it as a portable light. Comfortable, discreet and always ready to support you in those moments when a little light changes everything.

Technology that follows your daily rhythm

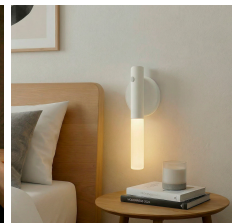

It integrates a PIR motion sensor with ambient light detection, so it only turns on when it is truly needed. With a range of up to 5 metres and a 120° angle, it comfortably covers entrances, hallways and passage areas with a uniform and pleasant vertical light. Its natural white 4000K light is comfortable at any time of day, and its ON, OFF and AUTO modes allow you to choose how you want to use it in each moment. It easily adapts to your daily rhythm, delivering a practical, intuitive and smooth experience without glare or complications. Everything fits naturally into your home, effortlessly.

Convenient battery life for cordless use

Its integrated 500 mAh battery provides up to 4 hours of autonomy, perfect for those moments when extra light makes all the difference. It recharges via USB-C and includes a USB-C to USB-A cable, making it quick and easy to have it ready again. With no cables or batteries required, you can move it from room to room, remove it whenever needed and use it with complete freedom. A practical everyday solution designed to adapt to your routine and always be there when you need it, with total convenience.

Vertical design made to fit easily

Its slim, vertical design blends discreetly into different areas of the home and is perfect for adding light without taking up space. The compact bar format with magnetic base allows you to use it as a fixed light or remove it easily when you want to take it with you. It installs on smooth surfaces using a magnetic adhesive base, with no tools required. The light then attaches to the base with a quick and easy gesture.
