

DESCRIPTION

KSIX Privacy+ 2026 screen protection film featuring an enhanced two-way privacy filter. The pack includes 10 sheets measuring 8 x 12 cm, designed to create customised screen protectors using the KSIX Automatic Cutting Machine.

Next-Generation Privacy Protection

The 2026 Privacy+ version incorporates upgraded privacy technology compared to previous generations. Its enhanced filter significantly reduces side visibility, making it more difficult for others to view personal information, messages, emails or sensitive data from adjacent angles.

In addition, the lower light transmission increases the anti-spy effect, delivering superior visual privacy in public spaces, offices, public transport and shared environments.

When the screen is held vertically, content remains visible only to the user. Turn the device horizontally whenever you wish to share your screen.

Improved Protection and Durability

Privacy+ 2026 features an optimised protective layer and a slightly increased thickness compared to previous versions. This provides a more robust feel and enhanced everyday protection while maintaining the flexibility and touch responsiveness characteristic of TPU films.

Compatible with Any Device

Privacy+ is suitable for screens measuring up to 18 x 12 cm. Thanks to the KSIX Automatic Cutting Machine, customised screen protectors can be produced for virtually any smartphone, tablet or gadget model and brand.

About the Automatic Cutting Machine

The ideal solution for retailers looking to optimise shelf space while avoiding stock obsolescence and stock shortages.

Integrated App

Features Wi-Fi connectivity and an integrated app with a touch control panel, allowing cuts to be configured according to the selected device.

Included Maintenance

Its extensive database of smartphones, tablets and gadgets is updated daily with the latest market releases, ensuring compatibility with newly launched devices.

Profitable

The machine quickly pays for itself thanks to the high margin generated by each film. It also eliminates the need to stock individual screen protectors for every device model.

2-Year Warranty and Technical Support

The KSIX Automatic Cutting Machine includes a 2-year warranty along with personalised support from our technical and sales teams, helping you get the most from your investment.
