

Kingsmith WalkingPad MX8-H Foldable Treadmill, Handrails, 6 km/h, 110 kg, SpeedDial, App

DESCRIPTION

The Kingsmith WalkingPad MX8-H is designed to help you stay active without sacrificing space at home. Its vertical folding system makes it easy to store when not in use, while the handrail provides greater stability during training. Equipped with a 1.5 hp brushless motor, SpeedDial control and compatibility with the KS Fit and Kinomap apps, it delivers a comfortable, quiet and fully connected walking experience.

Greater stability with every step

The integrated handrail provides secure support during training, improving stability and confidence while walking. It is an ideal solution for both beginners and those looking for greater comfort during longer sessions.

Vertical folding to save space

Thanks to its innovative Vertical Fold system, the MX8-H reduces its footprint from 0.87 m² during use to just 0.24 m² when folded. Its integrated wheels make it easy to move and store against a wall or in any corner of the home.

Quiet brushless motor

Its 1.5 hp brushless motor delivers smooth, efficient and quiet performance, allowing you to walk comfortably at speeds from 1 to 6 km/h. Its stable operation makes it ideal for use at home at any time of day without causing unnecessary disturbance.

Quick control with SpeedDial

The SpeedDial control integrated into the handrail allows you to adjust the speed quickly and precisely without stopping. Its LED display also shows your speed in real time, making it easy to monitor your workout at a glance.

Stay connected with KS Fit and Kinomap

Thanks to its wireless connectivity, the WalkingPad MX8-H is compatible with the KS Fit and Kinomap apps. View your statistics, track your progress and enjoy virtual routes to make every workout more dynamic and motivating.

Maximum comfort during training

Its spacious 100 x 38 cm walking area provides a stable and comfortable stride for users weighing up to 110 kg. The multi-layer cushioning system, made with EVA and PET materials, helps absorb the impact of every step and reduce strain on the joints.

Everything you need within reach

The handrail features a mobile phone or tablet holder, a bottle holder and a tray for small accessories, allowing you to follow a class, enjoy multimedia content or keep your personal belongings close at hand throughout your workout.
