

# DESCRIPTION

The HOTO tool kit brings together 26 pieces for assembly jobs, household repairs and DIY projects. It includes a 16 V brushless drill, hand tools, drill bits, screwdriver bits, a charging cable and a practical carrying case. A complete, organised solution that keeps the right tool close at hand for every task.

## 26 pieces for everyday jobs around the home

From assembling furniture and fitting shelves to tightening, measuring, cutting wire or carrying out small repairs. The kit combines power tools and hand tools with a range of drilling and screwdriving accessories to cover the most common jobs around the home.

- 1 HOTO 16 V brushless drill
- 1 multi-purpose screwdriver
- 1 self-locking tape measure
- 1 claw hammer with rubber protector
- 1 adjustable spanner
- 1 long-nose pliers
- 1 multi-purpose drill bit
- 7 drill bits
- 10 2-inch screwdriver bits
- 1 USB-C charging cable
- 1 carrying case

## 50 Nm brushless motor

The drill delivers a maximum torque of 50 Nm, 32 adjustment levels and two speed ranges. It can operate at up to 400 rpm for jobs that require greater control and reach up to 1,700 rpm for faster drilling in different materials. Its brushless motor provides efficient, stable and long-lasting performance.

## Automatic mode and digital display

Automatic mode regulates the torque and stops the drill when it detects that the screw has been tightened correctly, helping to prevent excessive force. The digital display shows the selected level, operating mode and battery status, while the pressure-sensitive trigger makes it easy to control the speed progressively.

## 18 accessories for drilling and screwdriving

The kit includes 8 drill bits and 10 2-inch screwdriver bits to suit different screws, materials and types of work. The chuck accepts accessories up to 10 mm and allows them to be changed quickly and easily.

## LED light for poorly lit areas

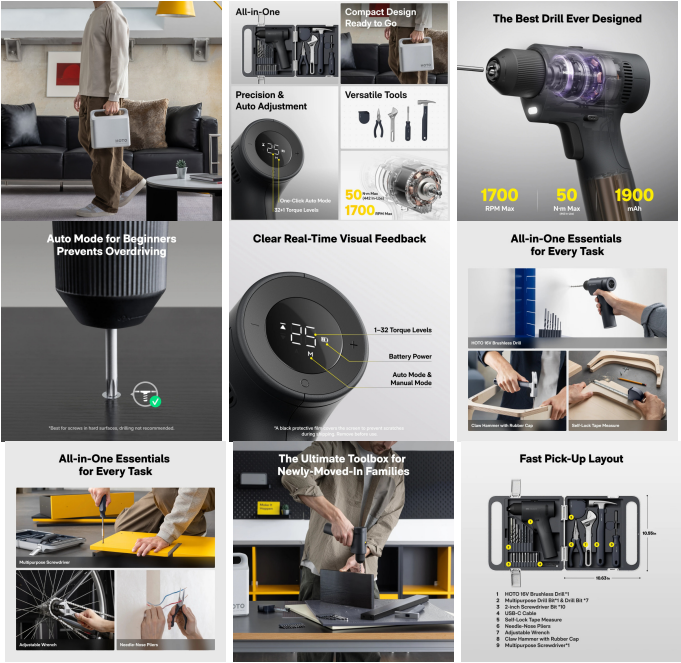

The built-in LED light shines directly onto the work area to improve visibility inside furniture, in corners and in other low-light spaces. This makes it easier to drill and drive screws with greater precision, even in hard-to-reach areas.

## Rechargeable battery with USB-C charging

Its 1,900 mAh rechargeable battery provides stable power delivery for everyday tasks. It charges via USB-C and reaches a full charge in approximately 120 minutes when used with a compatible 12 V, 2 A charger.

## Compact and organised carrying case

Each tool and accessory has its own dedicated space inside the case, keeping all 26 pieces protected, organised and ready to use. Its compact format and side clasps make both transport and storage easier.
