

DESCRIPTION

The KSIX USB-C to USB-C cable delivers fast and efficient charging for compatible devices thanks to Power Delivery technology and up to 60 W of power. In addition to charging, it supports data transfer speeds of up to 480 Mbps. Its 2-metre length provides greater comfort and freedom of movement, making it easier to use your device while connected.

USB-C to USB-C: one cable for more devices

With USB-C connectors at both ends, the same cable can be used with a wide range of compatible devices, including smartphones, tablets, earphones, power banks and other accessories. More compatibility for everyday use and fewer different cables to carry or keep at home.

Up to 60 W for more demanding devices

Power Delivery technology provides up to 60 W and adjusts the power supplied according to the device's charging requirements. This higher power output enables efficient charging for devices that require more energy, including tablets, laptops and other compatible USB-C devices.

Transfer your files in less time

With data transfer speeds of up to 480 Mbps, you can transfer photos, videos, documents and other files between compatible devices quickly and smoothly.

More freedom while charging

Its 2-metre length gives you greater flexibility when connecting and using your devices, without having to keep them right next to the charger or power socket. The extra reach also helps prevent pulling and reduces strain on the cable and connectors during everyday use.

TECHNICAL SPECIFICATIONS.

Color	White
Output connector 1	USB-C
Use	Car/home
Type of charge	Ultra fast charge
Max. Output (W)	30W
Input connector	USB-C
Cable length	2 m
Shape	Ergonomic
Packaging	Recycled carton
