HEAD AeroRun Pro open-ear headphones, outdoor running headphones, ENC, 17-hour battery life, adjustable fit, IP67 rating, Blue

DESCRIPTION

From the first miles of the morning to long weekend runs, HEAD AeroRun Pro are designed to let you run freely while staying aware of the route ahead. Their open-ear design keeps the ear canal clear, so you can listen to music, podcasts or directions while still hearing traffic, bicycles and what is happening around you. The adjustable band follows the shape of your head and keeps the headphones secure with every stride, even as the intensity increases. With IP67 protection against sweat, rain and dust, they are ready for demanding training conditions, while up to 17 hours of battery life lets you complete several sessions before recharging. ENC technology also helps keep calls clearer when you need to take them outdoors.

Ergonomics made for running

HEAD AeroRun Pro are designed to feel like a natural extension of the runner. Their ergonomic structure sits comfortably around the ears and follows the contour of the head, while the adjustable band lets you fine-tune the fit so they stay secure with every stride. The open-ear design rests naturally outside the ear without entering the ear canal, offering lightweight comfort from the first mile to the last.

Awareness that runs with you

The open-ear design keeps your ears free so you can enjoy your music without losing touch with the route. Traffic, bicycles, warnings, other runners and changes in the terrain remain part of your surroundings as you move. Open listening helps you stay more aware of what is happening around you, giving you the confidence to take on urban routes, demanding trails and outdoor training without shutting yourself off from the environment.

Controls that keep up with you

Quick Action technology places the physical controls where they are easy to reach naturally while you run. Adjust the volume, skip a track or pause playback with a direct tactile response, without taking your eyes off the route. Intuitive, precise control designed to work even when you are in full motion.

Battery life for the miles ahead

With up to 17 hours of playback and IP67 protection against sweat, rain and dust, HEAD AeroRun Pro are ready for long training sessions, weekend runs and several workouts before they need recharging. Music, podcasts or directions can stay with you throughout the route, with enough battery life to make sure the run ends before the power does.

The run continues. So does the call.

ENC technology reduces background noise picked up by the microphones so your voice comes through more clearly during calls. On urban routes, in busy areas or during breaks between training sessions, it helps minimise sounds such as traffic and nearby conversations. That means you can take a call without letting the surroundings take over the conversation.

TECHNICAL SPECIFICATIONS.

Color	**Black**
Technology	**ENC - Environmental Noise Cancelling**
Volume control	**Yes**
Operating range	**10 m**
Autonomy	**Up to 17 hours**
Battery capacity	**170 mAh**
Charging time	**1 hour**
Degree of protection	**IP67**
Target audience	**Unisex adults**
