

DESCRIPTION

Optimize your charging with our 25W wall charger with USB-C port: a handy little dock that you can take anywhere and charge your device in the fastest and most efficient way. You can use your own charging cable whether you're an iPhone or Android user, and benefit from all the advantages of Power Delivery 3.0 (PD) and Programmable Power Supply (PPS) technologies: forget about ever overcharging your battery or overheating your device.

Charge your smartphone up to 50% in just half an hour

Don't waste time: the 25W of power in this charger provides an ultra-fast charge that will ensure the fastest charging speed for your smartphone. Save waiting time thanks to charging 3 times faster than standard 5W chargers. Get ready to charge 50% of your battery in less than half an hour! (Test carried out with an iPhone 12)

Optimal charging for your Android

How many times have you overheated your phone while charging it overnight for 8 hours straight? If you are an Android user, the Programmable Power Supply (PPS) technology incorporated in this charger will adjust the voltage and current to the battery charge level in real time. A safe option for charging your smartphone or tablet so you'll never overheat your device again and keep your battery healthy. PPS compatibility for Samsung Galaxy S10, S20, S21, S22, S23 and their respective ranges and later models, as well as Note 10 Plus and later. If your device is not PPS compatible, you can still benefit from the innovative Power Delivery (PD) technology, which will adjust the charging speed to 20W.

Exclusive technology for iPhone and iPad

iPhone and iPad will also benefit from efficient charging. Your device will receive the highest power levels and faster charging thanks to the Power Delivery 3.0 (PD) charging protocol. It will also detect the end of the charging cycle and stop transmitting power to prevent the battery from overheating. An intelligent technology that takes care of the health of your battery and extends its life to the maximum.

Universal compatibility with all your devices

The multi-device feature of this charger offering up to 25W of power will be the best ally of your iPhone 8 or later, as well as your iPad Pro or iPad Air. You can also charge your smartphone, tablet and other Android devices with USB-C input. One fits all!

USB-C port: For now and for the future

The great usability and endless possibilities offered by the innovative USB-C standard will be the best ally for your smartphone. With a much faster speed than the traditional USB-A, you will significantly reduce charging times and have an incredibly efficient, safe and versatile technology.

Compact, lightweight and durable

A charger that fits in any pocket. Thanks to its light weight and small size, it is the ideal choice for use at home, on the road or in the office. Its flame-retardant casing features high-quality components to ensure maximum safety and wear

resistance, and the black finish gives it a premium design.

TECHNICAL SPECIFICATIONS.

Color	Black
Maximum output power	25W
Input parameters	100-240V
Output parameters	3.3V-5.9V/3A, 3.3V-11V/2.25A
Use	Home/Office
Type of charge	Ultra fast charge
Max. Output (W)	25W
Technology	PPS
Quantity of Type C ports	1
