KSIX Armor Extreme Flex Cover Tpu Reinforced High Resistance For Galaxy S10 Transparent

DESCRIPTION

The maximum protection.The Armor Extreme case acts as a true shield and ensures a high resistance to impacts and scratches. It's perfect to protect any smartphone that is in constant risk of falling or scratching. It shows the mobile phone's original design, while adding the look of a protective shield. ..High resistance against falls from up to 2 m.To ensure its resistance, the Armor Extreme case has been tested with the military drop test Mil-STD 810G. As a result, it has proven a high resistance against falls from up to 2 m. ..The resistance of a case with the precise fit of a cover.The Armor Extreme case is made of polycarbonate and TPU. Thanks to this hybrid condition, it combines the resistance of a case with the precise fit of a cover. Its interior is reinforced with an inner rubber layer and its backside is 5H coated. ..Incorporated air cushions.The Armor Extreme case incorporates air cushions in its corners, to ensure a perfect shock absorption against accidental falls or impacts. ..Main features.High resistance against falls from up to 2 m.Combines the resistance of a case with the precise fit of a cover.It incorporates air cushions in its corners...Technical information.Maximum resistance to impacts and scratches.It protects the smartphone against falls from up to 2 m.Material: Polycarbonate and TPU.It incorporates air cushions in its corners.Its backside is 5H coated.Its interior is reinforced with an inner rubber layer.
