

DESCRIPTION

Drive safely and keep your smartphone out of your hands with our Ksix universal mount. With double magnetic plate to attach to your smartphone as well as cases or covers.

Magnetic system

The magnetic attachment system makes it compatible with any mobile phone.

Double plate for two devices

Includes two metal plates (one round and one rectangular) that can be placed both behind your smartphone and on the case. If you prefer, you can also stick it on two different smartphones or two different cases so that you can place two mobiles in the same holder.

3M security

Each of the metal plates has a 3M guarantee sticking system that guarantees the best fixation for your mobile devices.

Compatible with cases and covers

The magnetic attachment system means that there is no barrier to resist. Simply bring your smartphone, with or without a case, close to the holder and it will stay firmly and securely in place during your journey.

Rotate 360°

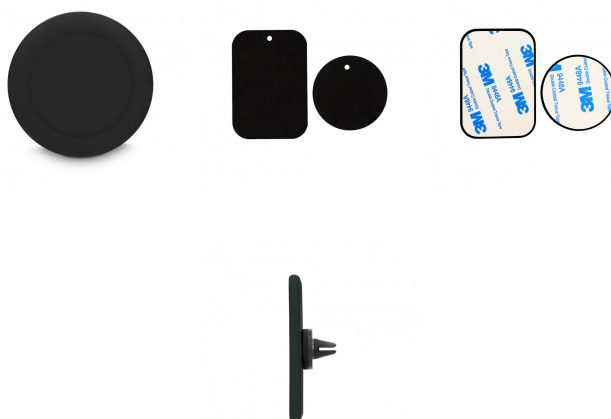

You can rotate your smartphone 360 degrees until you find the most comfortable position.

Universal

Designed for any model of smartphone available on the market.
